

Incorporating the Contact Form Solution Pack into your existing site

This document guides you through incorporating the pages included in the Contact Form Solution Pack into your existing site.

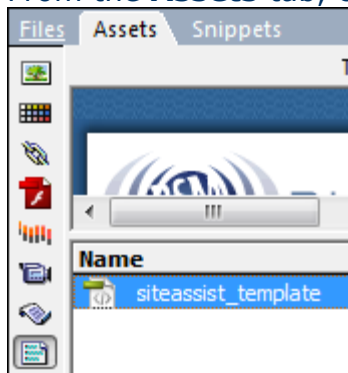

What Do You Need to Start?

- Dreamweaver 8, CS3 or CS4 (*Optional*)
- Contact Form Solution Pack

Applying your template

Dreamweaver templates (.dwt) can easily be applied to contact page. If you are using a Dreamweaver template, follow these steps for applying the template to your page.

1. Copy the Solution Pack files to your current site in Dreamweaver.
2. Open the contactus.php or contact_styled.php file.
3. From the **Assets** tab, choose the **Templates** option.

4. Right-click the .dwt file that you are using for your site.
5. Choose **Apply**.
6. Select the appropriate editable regions for each portion of your page.
7. Click **OK**.

Linking to the Contact Form

Now that your contact form has the same design as the other pages in your site, you simply need to link to your contact form from within your page.

1. Add a link to the `contactus.php` or `contact_styled.php` file anywhere within your site.
2. With the links added, uploaded all the files, including the Solution Pack files to your live server.
